Arrival of the Steamship Pacific. HALIFAX, June 29.

The steamship Pacific arrived off this port at 3 o'clock this morning. She was boarded one hundred miles out by the new Schooner of the associated press.

Cotton was firm at last quotations. Sales for Saturday, Menday and Tuesday were 19,000 bales. Flour was well maintained at last quotations. Corn advanced 15a 25 per quarter. Provisions were dull at previous quotations. Stocks firm.

Later advices from India are unfavorable, and from China the commercial intelligence is not regarded as favorable. The English ministers have been defeat-

ed in the Greek question, and their resignation was hourly expected.

ENGLAND. - The house of Lords was the scene of an exciting debate on Monday night, growing out of the motion of Lord Stanley, relative to the conduct of the government in the Greek affair. Lord S. prefaced the introduction by a speech of three hours, in which he contended that the leading characteristics of the whole transaction with Grecce, was prevarienting and dishonorable on the part of the Ministry. At the conclusion of this speech, which was loudly cheered throughout its delivery, he m de a vigorous appeal to the House not to allow the mighty power of England, to be prostituted in opposing a weak and almost defenceless nation.

The Marquis Landsdown undertook the defence of Lord-Palmerston but with poor success, as on a division, the ministry were as before in the minerity. The bill abolishing the Lord Lieutenancy of Ireland, passed the second reading by a large majority.

Should the Ministry not resign there is a growing belief that the great exhibition of all nations in London will fail for want of necessary funds. The growing crop in England and Ireland

looks universally promising,

An announcement made on Friday, that

the Russian Government protested against the manner in which the affair was terminated by Mr, Wise, is fully confirmed by accounts subsequently received.

The adverse report of the committee on the President's salary bill, caused great sen-sation in the Assembly. The Globe corres-pendent is assured that the President will not accept any modification of the terms d in the bill. A cabinet council was held at which it was resolved that the Ministers should resign in the event of the President's salary bill being rejected by the Assembly.

Custom duties between Austria and Hun-gary have been abolished, the government, however, do not propose to relinquish their monopoly in the tobacco trade.

Table Rock Pallen! NIAGARA FALLS, June 29-2 P. M. The Table Rock at the Falls fell with a tremendous crash which was heard for miles around. A carriage and six horses were passing over it at the time, and had just time to escape. The carriage was carried away with the rock. It is stated that the guide and some visitors were under the rock

Arrival of an East Indian Embassy. The steamship Ripon brought to Southampton on the 28th, from Alexandria, an

extraordinary embassage from the Kingdom of Nepaul, on the borders of Thibet. It consisted of his Excellency General Jung Bahadoor Koorman Rangee, Prime Minister and Commander-in-Chief, and his suite of twenty-four persons, the most distinguished of which were Col. Juggut Shumshore Koorman Ranngee, and Col. Dheer Shumshere Koorman Ranagee, brothers of the general, Capt. Rummihr Singh Adhikaree Khajee Kurbeer Khutree, Capt. Hemdul Sing Thapa, Lieut. Kurber Khutree, Lieut, Lall Singh Khutree, and Lieut. Bheem Sen Rana, and a great many other terrible men with terrible names. The general's visit to England is as Ambassador Extraordinary from the King of Nepaul to the Queen of England, and he is charged with a complimentary letter and costly presents, consisting of the most val-uable Nepaulese productions and manufactures, worth, it is said, nearly a quarter of a million of pounds sterling, from the King to her Majesty.

According to the accounts in the Southampton papers, the travelling expenses of the embassy, since it loft Nepaul, have amounted to nearly ten thousand pounds. His excellency and suite profess the religion of Buddhism; and on account of their strict notions respecting their religion, diet, and ablutions, and their dread of having their food, or the vessels which contain it, touched by christians, they were compelled to engage the whole of the forecabins and saloons of the Ripon, in which they fitted up a cooking apparatus, which was constructed out of a large square box made of planks and paddle floats, filled with mud and sand. The fuel they used was charcoal. Their principal food on board was poultry, kids, eggs, rice, and vegeta-They took in themselves, at each port they touched at, what water they

The features of the Nepaulese partake of the Mongolian and Hindoo caste. Many of the embossy are most pleasing and handsome looking men, and their dresses are gorgeous beyond description.

The general is a handsome and most intelligent man, about 32 years of age, very dark, with long jet black bair. He is the first Hindoo of high caste that has visited England.

America. Carlyle, in his last pamphlet, speaking

of America, asks : What great human soul, what great thought; what great noble thing, that one could worship or loyalty admire, has yet been produced there?

'What great human soul?' What great thought?'

Liberty. What great noble thing? A home for the homeless: Bread for the

we do not know that these are things which sycophants could worship, or loyalty admire, but the fame of the first—the sacredness of the second, and the uncircum-scribed extent of the third, are what free-men admire and intend to defend.—Par-lor Journal.

Wellington liberated Spain in a red coat extravigantly over estimated at six pence, and Napoleon entered Moscow in a green

THE CHEVASSE AT BONNET CARRE.-The mighty mass of water continues to flow through the crevasse with undiminished force and volume, and has no doubt saved the country below it, including thecity, from great injury and a probable overflow. We have but little doubt that for all future time it will form one of the permanent outlets of the Mississippi, particularly as it will be so very difficult, if not impracticable, by any human efforts to close it, even when the river is at low-water mark. This, at any rate, cannot be accomplished, except at a vast outlay, for we understand that the current has already made itself a channel sixty to eighty feet deep, and the stream of the crevasse is actually wider than the river itself. We see no alternative but when, in low water, its dimensions are contracted to the deep portion of the channel it has worn, to commence the erection of artificial banks or levees, within which to confine it in seasons of flood, and let it remain as a permanent and necessary "tap" upon the superfluous flood of the Father of Waters .- N. O. Bulletin.

Hillsborough and Belpre Railway.

We learn that the Committee of Council who went out to examine the location of the line of Railway to Hillsborough, are satisfied, and will report in favor of an advance by the City of Cincinnati of the \$100,000 in aid of the work.

We learn also, from the best authority, that the terms of the union of the Belpre with the Hillsborough, are so favorable, that they will receive the sanction of both companies. The road from Greenfield to Hillsborough will soon be put under contract. The merging of the two companies will secure to the Belpre company the right to enter this city either by the Little Miami, or upon a route crossing the northern part of Hamilton county to Reading, and coming down the valley to Mill Creek. -Cincinnati Gazette.

An Interesting Fact.

We learn, says the Toledo Blade, upon the authority of Rev. C. L. Watson, late of Maumee City, that Henry Williams and his sister Henrietta, of Maumee, arrived at Buffalo. on their return from Georgia. on Saturday. On the same day Capt. Roby urged them to take passage on the Griffith, next morning, and, as an inducement, offered to remit the fare. Williams declined on the ground that it was against his principles to travel on Sunday. On Sunday morning both Roby and Donovan again urged them to take passage, but he again declined upon the same ground .-The boat came without them. Their firm adherence to christian principle saved their lives .- Cleveland Herald.

Newspaper in a Family.

Dr. Franklin once remarked, and truly too, that a newspaper taken in a family seems to shed a gleam of intelligence around. It gives to children a taste for reading, it communicates all the important events of the day. It is a never failing source of amusement, and furnishes a fund of instruction which will never be exhausted. Every family, however poor, if they wish to hold a place in the ranks of intelligent beings, should take at least one newspaper. And the man who, possessed of sufficient property to make himself easy for life, surrounded by children, enger for knowledge, is instigated by a vile spirit of cupidity, and neglects to subscribe for a newspaper, is deficient in the duties of a parent or a good citizen, and deserving of the censure of his intelligent neighbors.

The Journal of Commerce says, that a committee of scientific gentlemen from this city, Princeton and Boston, went to Worcester to examine Mr. Paine's discovery, and that they found his production of gas to be a trick. They will scon expose the fraud.

A money lender serves you in the present tense, he lends you in a conditional mood, keeps you in the subjective, and ruins you in the future.

Persons who are always innocently cheerful and good humored, are very useful in the world ! they maintain peace and happiness, and spread a thankful temper amongst all who live around them.

Wherever you find an ignorant people, rely upon it, but few papers are taken. Men and children are well informed only when well supplied with newspapers.

HAPPINESS .- He that enlarges his curiosity after works of Nature, demonstrably multiplies the inlets of happiness.

Many new years you may see, but hap py ones you cannot see without deserving them. These virtue, honor, and knowledge alone can produce.

THE BLOOD OF AGE .-- A good woman never grows old. Years may pass over her head, but if benevolence and virtue dwell in her heart, she is as cheerful as when the spring of life first opened to her

Great many are charitable to their bitterest enemies, and can sympathise with the failings of their fellow creatures. It is only the narrow minded who make no allowance for the faults of others.

With many readers brilliancy of style passes for affluence of thought; they mistake butter cups in the grass for immeasurable gold mines under the ground-

Perform a good deed, speak a kind word bestow a pleasant smile, and you will receive the same in return. The happiness you bestow upon other is reflected back to your own bosom.

Cruelty constitutes the greatest moral distance at which an intelligent creature can be removed from a God of forbearance

Those who befriend genius, when it is struggling for distinction, befriend the world, and their names should be held in remembrance.

Matrimony is a circus. Many noble creatures enter it, run round and kick up a fine dust, but how few get properly trained and broke to it.

Summer Fashions.

THE subscriber has received her Sum-meratock of fashiou-able Bonnets consisting in part of Embr'd Lace, Tis-

sue, Albino, Zephyr, Cactus Lace, Straw colored Hungarian, Embr'd Excelsior, White Brocade and Pamelias, Fluted Satin, Coburg, Queens Own, Milan Chief, White Lace, Chipa Pearl, Florence Braid, Jensen Chipa Pear ny Lind, California and white Chip, Tulip Braid, fine soft English straw, etc., ctc. A large quantity of Childrens and Misses chip Hats, Gipseys and Bonnets. A full stock of fashionable Ribbons, trimmings for dresses, thread and Lysle Laces. Ladies and children's Lysle thread Gloves. Fine French Flowers, Sprigs and Roses, together with a good assort-ment of fancy Milmery which will be sold

cheap. N. B.—Particular attention paid to Altering, Bleaching and Trimming Bonnets.

TRICKS OF QUACKS.

Let Everyboy Read this Carefully—There is a Sarsparilla for sale in the different towns called S. P. Townsend's Sarsparilla. It is advertised as the ORIGINAL, GENUINE, and all that. This Townsend is no doctor and never way; but was formerly a worker on ratiroxals, causia, and the like—yet he assumes the title of Doctor for the purpose of gauing credit for what he is not. He says "he has attended two medical schools, and practiced for fifteen years!" Now the truth is, ho never practiced medicine a day in his life! Such wifeld, wicked misrepresentation looks bad to the character and verseity of the man. I wish most sincretly, he had never made those statements of himself or of me. When will men learn to be honest and truthful in all their dealings and intercourse with their felings and intercourse with their manufacturing his mixture, stating the large sums he would make, as an inducement to embark in the business. These men have been insulting and libelling me in all possible forms, in order to impress the public me in all possible forms, in order to impress the public me in all possible forms, in order to impress the public with the belief that the Old Dector's Sarsaparilla was not the genuine, original Recupit. This S. P. Townsend says I have sold the use of my name for \$7 a week. I will give him \$500 if he will produce one single selitary proof of this. His statements of Thompson, Skillman & Co., are nothing but a tissue of Thompson, Skillman & Co., are nothing but a tissue of This possible to the source of the public, and keep the truth down in regard to his souring, fermenting compound. This is to caution the public to purchase none but Old Dr. JACOB Townsend's Sarsaparilla, havi

Old Dr. Jacob Townsend,

THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of age, and has long been known as the AUTHOB and DISCOVERER of the GENUINE ORIGINAL "TOWNSEND SARSAPARILLA." Being paor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, precisinged its woodeful.

been healed of sore diseases, and saved from useful precisioned its wonderful.

HEALING POWER.

This GRAND AND UNEQUALLED PREPARATION manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration.

Unlike young S. P. Townsende, it improves with age, and never changes but for the better: because it is prepared on accentific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Dr's Sarsaparilla. The Sarsaparilla root, it is well known to medical men, contains many medicinal properties, which if retained in preparing it for use, produce fermentation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are so celafite that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific process, known only to those experienced in its manufacture. Moreover, these volatile principles, which fy off in vapor, or as an exhabition, under heat, are the very essential medical propty to those experience in the manacate these volatile principles, which dy off in vapor, or as an exhalation, under heat, are the very essential medical properties of the root, which give to it all its value.

Any person can boil or stew the root uil they get a dark colored liquid, which is more from, the coloring matter in the root than from anything else; they can then strain the institute of the root than from anything else; they can then strain the institute of the root than from anything else; they can then strain the institute of the root in the strain the institute of the root in the strain the institute of the root that the sour molaness, and then call it "SARSAPARILIA EXTRACT or SYRUP" But such is not the article known as the GEN UINE OLD DR. JACOB TOWNSEND'S SARSAPARILIA.

SARSAPARILLA.

This is so prepared that all the inert properties of the Sarsaparilla root are first removed, everything capable of becoming acid or fermonation is extracted and rejected, then every particle of medical virtue is secured in a pure and concentrated form; and thus it is remisered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of fanumerrable Diseases.

Hence the reason why we hear commendations on every ride in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION. DYSPEPSIA, and LIVER-COMPLAINT, and in RHEUMATISM, SCROFULA, PILES, COSTIVENESS, all CUTANE, OUS ERUPTIONS, PIMPLES, BLOTCHES and all affections arising from SARSAPARILLA.

IMPURITY OF THE BLOOD. IMPURITY OF THE ACCOMPLIANT AND ADDRESSES A MARVEILOUS Efficacy in all complaints arising from Indigration, from Acidity of the Stomach, from unequal circulation, determination of blood to the head palpitation of the heart, cold feet and hands, cold chills and hot flashes over the body. It has not its equal in Cold's and Caughs; and promotes easy expectoration and gentle perspiration, relaxing strictures of the lungs, throat and every where part. piration, relaxing strictures of the jungs, support of the part.

But in nothing is its excellence more manifestly seen and acknowledged than in all kinds and stages of acknowledged than in all kinds and stages of FEMALE COMPLAINTS.

FEMALE COMPLAINTS.

FEMALE COMPLAINTS.

It works wonders in cases of Fluer Albus or Whites, Falling of the Womb, Obstructed, Suppressed, or Fainful Menses, Irregularity of the monatural periods, and the like and is effectual in curing all the forms of Kidnay Diseases. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all forms of Nervous Diseases and Debility, and thus prevents or relieves a great variety of other maladies, as Spirad irritation, Neuralgia, St. Vitus' Dance, Succoring, Epileptic Fits, Conventions, de.

It cleanses the blood, exques the liver to healthy action, tones the stomach, and gives good digestion, relieves the bowels of terpor and constituently all over the body, and the meenstible perspiration; relaxes strictures and tiganess.

rifies the skin, equalizes the circulation of the blood, producing gentle warmth worally all over the body, and the mesnathle perspiration; relaxes strictures and tigencess, removes all obstructions, and invigorates the entire nervous system. Is not this then

The Medicine you pre-eminently need?

But can any of these things be said of S. P. Townsond's inferior article? This woting man's liquid is not to be COMPARED WITH THE OLD DR'S, because of one GRAND PACT, that the one is INCAPABLE of DETERIORATION, and

NEVER SPOILS,
while the other DOES: souring, fermenting, and blooding the bottles containing it into iragments; the sour, acfoliquid exploding, and damaging other goods! Must not this herrible compound be poisonous to the system 1-Phat! year acid into a system circular diseased with acid? What causes Dyspepsia but acid? Do we not all know that when food sours in our stomachs, what mischief it produces 1—fatulence, heartburn, palpitation of the heart, liver campiant, diarrhose, dysentery, colic, and corruption of the blood? What is Scrofula but an acid humor in the body? What produces all the humors which bring on Eruptions of the Skin, Scald Head, Salt Rheum, Eryspelas, White Swellings, Fever Sores, and all ulcerations internal and external? It is nothing under heaven but an acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumanism but a sour and acid fuld which insinuates itself between the joints and elsewhere, irrisating and infaming the delicate tissues appropriated that acid? So of nervoins diseases, of impurity of the blood, of daranged circulation, and nearly all the aliments which bring the this continuous and infaming the delicate tissues enough which it acid? So of nervoins diseases, of impurity of the blood, of daranged circulation, and searly all the aliments which artified human nature.

Now is it on horrible to make and sell, and refinitely secret to use the

sorre to use this SOURING, PERMENTING, ACID "COMPOUND" OF S. P. TOWNSEND, and yet he would fain have it understood that Old Dr. Jacob Townseed's Germine Original Sarasparilla, is an IMITATION of his inferior preparation!

Heaven forbid that we should deal in an article which would bear the most distant resemblance to S. P. Townsend's article!

Heaven forbid that we should deal in an article which would bear the most distant resemblance to S. P. Townsend's critics!

We wish it understood, because it is the absolute trath, that S. P. Townsend's article and old Dr. Jacob Townsend's Sareaparilla are Asaren-wide apart, and infinitely dissimilar; that they are unlike in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no clemust, no pharmaceutiar—knows no more of medicine or disease than any other common, unscientific, unprofessional wan, what guarantee can the public have that they are receiving a genuine scientific medicine, containing all the virtues of the articles used in preparing it, and which are incapable of changes which might reader them the AGENTS of Disease instead of beath?

But what else should he expected from one who knows sothing comparatively of medicine or disease? It requires a person of some agarsines to cook and earse up aven a common decent meal. How much more important is it that the persons who manufacture medicine designed for WEAK STOMACHS AND ENVERBILED SYSTEMS, should know well she medical properties of plants, the best manner of securing and concentrating that healthy virtues, also an extensive knowledge of the various diseases which affect the human system, and how to adapt remedies to have diseases?

It is to arrate frauds upon the unfortunate, to pour admin to wounded humanity, to kindle hope in the despairing besom, to restore health, and bloom, and viger into the crushed and broken, and to benish mirraity that OLD Dillacob Townsend here and know he with the reach, and to the knowledge of all why the distributions of the portunity and means to bring his

Grand Universal Concentrate of Remedy within the reach, and to the knowledge of all why deed that they my the analysis of the portunity and means to bring his

Grand Universal Concentrate of Remedy within the reach, and to the knowledge of all why deed that they my the second and knowledge of all why the stant the

For sale by J. L. M'VEY & Co.

To Contractors.

SFALED PROPOSALS will be received at the office of the Board of Public Works in the city of Columbus, until the hour of 12 o'clock (noon) of Wednesday, the Tenth day of July next, for the construction of the following work, to wit:

Ohio Canal.

For the re-building of Locks No. 51, 52 and 55, near Portsmouth.

For the re-building of Locks No. 27 and 28, south of Licking Summit, near Lockbourne.

For the re-building of the Cranberry Lock

east of Newark.

For the re-building of one of the flight of Locks at the junction of the Dresden side cut and the Muskingum river, near Dresden side cut and the Muskingum river, near Dresden.

For building a Waste Gate, with substantial cut stone abutments, on the south-east embankment of the Licking Summit Reservoir.

Hocking Canal,

For building a substantial Culvert of cut stone Masonry opposite Worthington's Mill, in Hocking county, with the necessary embankment, &c.

Connected with the above jobs will be the embankment and other items incident to such work-and they are of a character worthy the attention of Contractors. It may be deter-mined to re-build Locks No. 51, 52, and 55, near Portsmouth, during the present Fall, which the bidder will consider. This determination, if concluded, will be expressed in the specifications.

The masonry must be of the best class-and the stone of the most approved qualities, and from quarries from which stone has recently been furnished for Locks near Portsmouth, Lockbourne and Dreaden—and for the Lock near Newark, to be of stone to be approved by the Engineer—as must the stone in all cases. Plans and specifications may be seen at the office of the Board of Public Works, at Colum-

bus, at any time after the 1st day of July, and information in relation to the work near Portsmonth, and near Lockbourne, may be had at any time after the 25th inst,, from Wm. Mc-Aboy, Esqs., Re. Eng. Southern Division Ohio Canal—and from Sam'l G Foster, Res. Eng. Middle Division Ohio Canal, in relation to the work near Newark, Dresden, Licking Summit Reservoir and Hocking Canal. Bidders unknown to the undersigned, must give satisfac-

tory references.

Memphis, Tenn., March, 1850.

The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare favorably with the most distinguished in our country.—The Medical Faculty constitutes an anomaly in this or any other country—nll of them are able lecturers and the best of teachers.

Those who will contemplate our geographical position and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to

can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to fiealth, including all seasons of the year, we deny that any other city has some.

A common error exists in the minds of many students relative to the place of studying medicine: those who intend practicing among the diseases of the west and south should certainly educate themselves at a school whose Faculty are practically acquainted with these diseases.

That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a vare in action, which augurs well for its future success, and that the peculiar internal organization which connects them, cannot be interrupted.

President of the Momphis Institute, April 1, 1880.—5286.

ON SECOND STREET, BETWEEN MARKET AND COURT, One square from the Steamboat Landing, Portsmouth, O.

The subscriber respectfully informs her friends and the public generally, that she will continue in the above named, well known

House of Entertainment heretofore kept by her late husband, Thomas Coney, where she will be happy to wait upon all who may favor her with their patronage. The house was not long since chlarged and furnished in a style to make every guest comfortable, The table will at all times be well supplied with the best that the markets afford; and the bedding

will be clean and neat.

A commodious Stable, Carriage house and Wagon yard adjoins the house, in charge of a careful Hostler, where single horses or teams will be well attended and supplied with an a-bundance of the best Hay and Grain. In short, the subscriber intends that her house shall be a comfortable home for her guests. The charges as heretofore will be reasonable.

The Coaches for the North and East pass the

house daily, morning and evening.

ANN CONEY.

Portsmouth, October 23, 1849.—29yl.

Inflammatory Rheumatism.

THE AMERICAN RHEUMATIC BALBAM!! A New Remedy Lately Discovered IN the vegetable kingdom—a sure and perma next cure for all Rheumatic Complainte,

Inflammatory, Chronic, Acute and Mercurial Rheumatism, Gout, Lumbago, Spinal Affec-

tions, etc., etc. This medicine has long been sought for. It has been said that Rheumatsm could not be cured; but there is a remedy designed by nacured; but there is a remedy designed by ma-ture for the cure of every disease that the hu-man system is subject to. At last a remedy has been found that cures Rheumatism of the worst form—one of the most valuable vegetable pro-ductions of the earth—the greatest and most important discovery of the age, and a wonder-ful blessing to the human family. It cures with-out sickening or debilitating, and renews strength and vigor to the whole system. It has cured, during the past three months, ever 500 cases that were considered incurable.

Certificates of the curative properties of this medicine can be seen by calling on the Agents.
